About us

3S design is a family-run company. We offer a range of services: sale of products from our own brand, architectural and interior design, as well as industrial design. In the studio, we work in tight collaboration with our family's metal workshop, which also produces all our designs.

3S design products are innovative and high quality. With our designs, we try to solve modern storage problems. In the current times of fast consumerism, we strive to design and produce adaptable furniture using natural or recyclable materials with a long lifespan. Working to a great extent by hand in our family-owned workshop in Slovenia, we are able to pay special attention to each and every detail of our products, ensuring the highest quality for our customers.

"3S magnet" allows easy installation of accessories, without drilling.

3S magnet

Magnetic storage system consisting of wall panels and magnetic accessories.

»3S magnet« is an innovative wall organization system of wall coverings and magnetic shelves, holders, hangers, and hooks that fasten onto the wall panels.

Due to magnetic fastening, the system is incredibly flexible. With one simple action you can move the accessories around, re-designing your living environment quickly according to your needs and wishes.

The magnetic accessories are available for a wide range of applications, designed for use in kitchens, bathrooms, hallways, living rooms, kids' rooms, offices, and more!

3S magnet

Wall panels

»3S magnet« wall panels are elegant, pleasant to the touch, are very easy to clean and maintain, have hair thin seams when joined together, and have invisible sealing and installation mechanisms. The wall coverings are highly resistant to UV rays, fingerprints, and scratches, as well as being fireproof. They work great as kitchen backsplashes, but can be installed in a wide variety of rooms and applications.

A custom made 3S magnet wall panel adapts perfectly to your interior design and your specific needs. However, you can also choose from one of our standard-sized wall panels, which can be shipped in a couple of days.

3S magnet in the bathroom

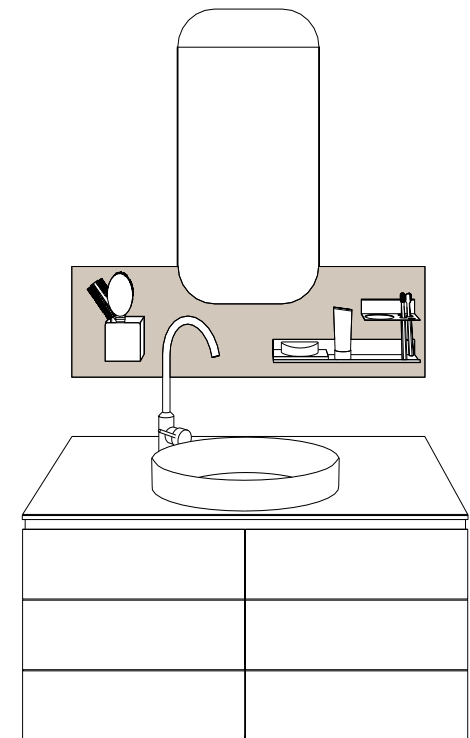

The refined elements of the "3S magnet" system complete the look and functionality of a modern bathroom, without drilling into ceramic tiles or stone.

3S magnet in the hallway

As the seasons change, "3S magnet" adapts to your storage needs, especially in hallways and entrances.

**3S magnet
in the
kid's room**

The multifunctionality of the »3S magnet« system enables countless possibilities of use, even in children's rooms, where creativity knows no bounds.

The movement of the magnetic elements allows the »3S magnet« system to grow with the child and adapt to their age and needs.

A "3S magnet" wall panel in a kid's room allows the child to have their creative space, a surface which they can design and change according to their wishes and their own imagination. The GRAPHITE wallcovering is also designed to be written on with chalk and chalk markers.

Steelline

Steelline is a range of multifunctional metal furniture with minimalistic design.

"A place for everything and everything in its place" was our guiding principle while designing the Steelline series. Our goal was to create a series of useful storage areas for things that are usually scattered around the apartment or office. Clean lines, smooth surfaces, neutral colors and modular design make it easy to combine Steelline products with your existing furniture. Because the furniture is multi-purpose, you can use it in different spaces for different purposes: from living rooms, to kitchens, bathrooms, hallways, shops, offices...

Plutoo

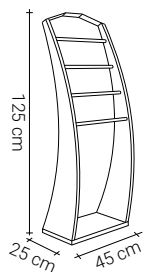

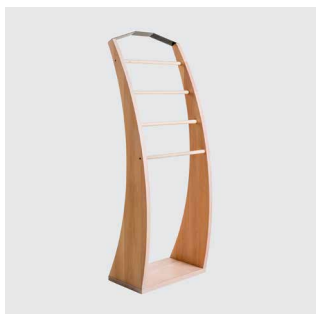

*Plutoo clothes stand –
a modern spin on the
clothes valet.*

Plutoo's elegant design follows its function. Clean and timeless design, smooth surfaces, various types of solid wood and different colors ensure that you can choose a clothes rack that will fit your interior perfectly.

With room for more clothes than one would think at first glance, your wardrobe can air out and stay wrinkle free, which means less washing and ironing. As a result, this clothes stand improves your ecological footprint while extending the life of your clothes.

The Plutoo clothes valet takes up very little space and is an indispensable addition to any home.

Technical information

3S magnet

The wall coverings are fireproof, resistant to water, heat, UV light, scratches and fingerprints resistant.

WALL COVERINGS :

3S MAGNET WALL PANEL AS A BACKSPLASH

We produce both standard and custom 3S magnet wall panels / wall cladding.

The installation in the kitchen is similar to glass backsplashes – the panels have to be pre-cut and are adhered to the wall with a liquid adhesive. During production of the panels, any cutouts for electrical outlets or other obstructions need to be done by our workshop. Once the panel is delivered for installation it is not recommended that any further modifications be performed.

3S magnet panels are fireproof, as well as highly resistant to water, heat, and UV light. Because we use a special type of powder coating, the panels are also relatively resistant to scratches and fingerprints.

THICKNESS:

3mm

SIZE:

The maximum size of a single panel is 2700 x 700 mm or. 2000 x 1200 mm. If there is a need for a larger cladding, two or more panels are joined together. The connecting edges are treated by hand, so the connection is very thin and, thus, almost invisible.

USE of the panels as a black board:

We only recommend GRAPHITE color if you wish to write with chalk on the panels. Years of experience have shown, that using chalk markers is much better for households instead of chalk, as they don't crumble or dust. The markers are easy to use and clean from the panels.

Chalk markers can be used to write on other colors of panels as well, but there might be some residual marks. In any case, we recommend that you test any new markers on a less-conspicuous part of any color panel before widespread use, because some types of markers are more aggressive than others and can leave marks. Make a small mark in one of the corners of the panel, leave it for a couple of hours and then try to clean it off. If it removes easily, your marker is good to use.

INSTALLATION OPTIONS:

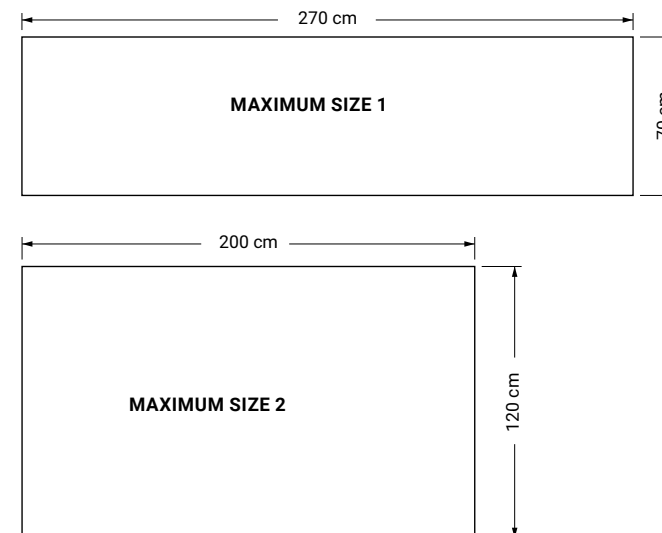

We use two methods of attachment:

- **gluing** (without drilling)
- **anchoring** with screws (with drilling)

GLUEING (appropriate when mounting on a hard surface (tiles, wood, stone) or when the panel "sits" on a surface (worktop, floor, etc.):

Smaller (standard) panels are glued with a combination of double-sided tape (included) and liquid mounting adhesive.

If you install 3S magnet panels as a backsplash, it is recommended that a combination of silicone sealant and liquid mounting glue be used.

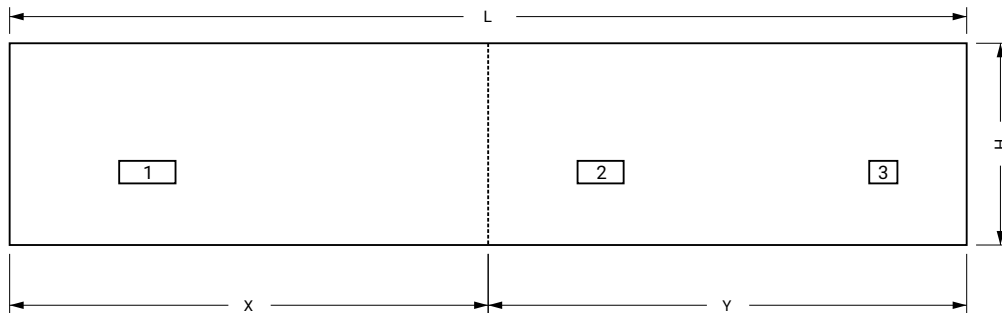

ANCHORING (appropriate when mounting the panel in the middle of a wall): Small holes need to be drilled (2cm deep) for the anchoring pins that have been welded on the back of the panel. Some mounting adhesive should then be applied to the back of the panel and into the holes. Finally, the mounting pins are pressed into the holes filled with glue in order to anchor the panel into the wall, with special care made that the panel is supported against the wall while the glue is drying. On request, we also offer mounting via screws. Screws are included with the panel in the same color as the panel.

In both our standard installation methods, the mounting mechanisms are hidden, so the panels have a very clean look. We also provide extensive installation instructions for all of the options.

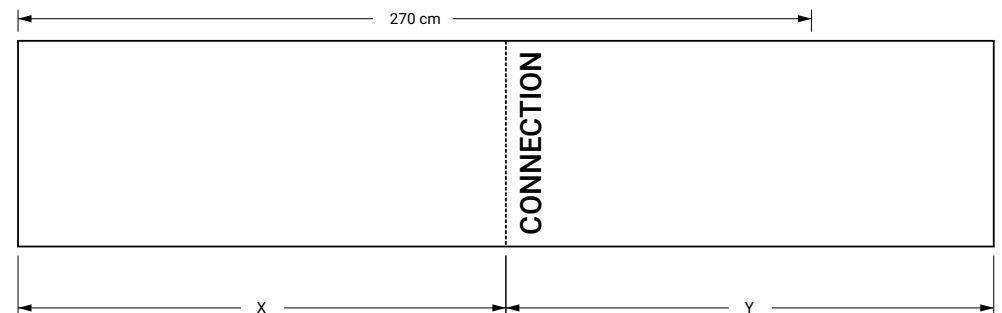

CLEANING:

Cleaning 3S magnet splashbacks and accessories is very simple and, since the panels are not sensitive to finger prints, you don't have to do it often. Before cleaning, empty the magnetic accessories and then remove them from the 3S magnet panel. For best results with grease stains, use hot water with dish detergent and a soft cloth (or a sponge). Afterwards, to get a perfect result, you can clean the surface with glass cleaner and a microfiber cloth. It is recommended that any solid oak wood elements only be cleaned with a dry or damp cloth. However, if you feel there is a need, you can oil them with a natural transparent oil (approximately once a year)."

EXAMPLE OF A SKETCH WE NEED IN ORDER TO MAKE AN OFFER:

IF THE LENGTH OF THE WALL EXCEEDS 270 cm, THE PANEL IS MADE OF TWO PARTS

TO GET A QUOTE:

In order to make an offer for your specific application, we need the dimensions of the wall cladding - length x height (with an accuracy of about 2 cm) and the number of cutouts for electrical outlets and other possible obstructions. If the wall covering is of an irregular shape, we also need a sketch with dimensions.

CUSTOM WALL COVER ORDER:

To complete a custom order, we need a sketch with accurate dimensions and the method of installation (gluing or anchoring). If you don't know which to choose you can also send us a picture of the space where the panel is to be installed and we will suggest the best and easiest installation option.

When taking your own measurements, we will also provide instructions for any measurements we require.

DELIVERY TIME:

For custom-made wall panels, the lead time is 30-60 days (from the day the offer is confirmed).

MAGNETIC ACCESSORIES:

Each product has a declared load capacity, which we guarantee when used on a 3S magnet wall covering. If you use the magnetic accessories on other surfaces, the load capacity is not guaranteed.

Metal colors:

Standard colors (stocked):

BLACK - RAL 9005

WHITE - RAL 9016

GRAPHITE (dark grey with mettalic effect)

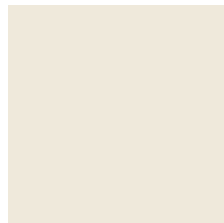

Special and custom colors (made-to-order):
